

Ora

A User's guide to the Troll-squashing Discord Bot

“Discord Servers are tedious to manage. Managing the users is like taking care of a herd of sheep.”

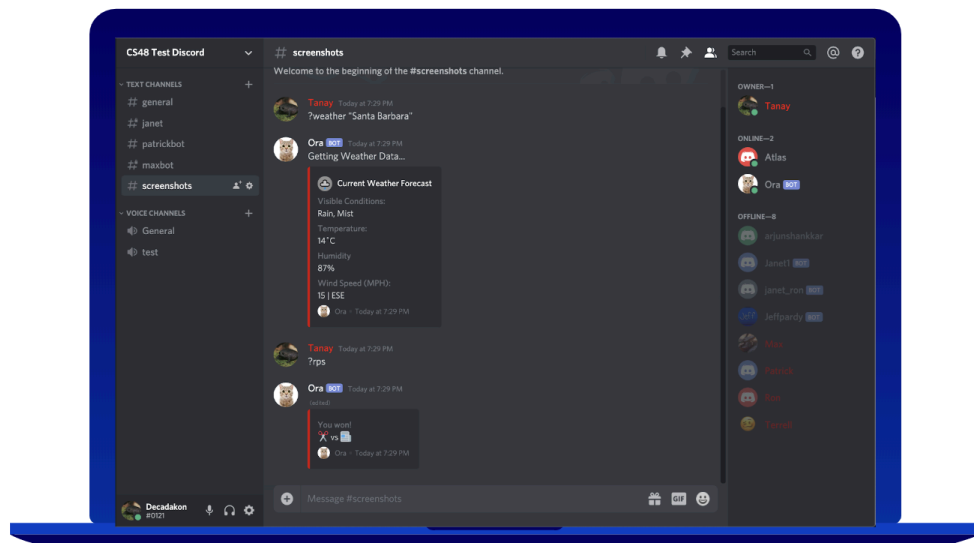

-A Discord Moderator

“Discord Servers are kind of boring at times. I wish I had fun games to play in the chat.”

-A Discord User

Introduction

Does your Discord server suck? Is it hard protecting your law-abiding citizens from trolls and goblins? Look no further. Ora is the most flexible and easy to use bot available to manage your Discord Server! Our bot offers a wide range of unique features. Whether you just need a simple music bot, or you want to browse Twitter from the comfort of your Discord server, Ora is the bot for you!

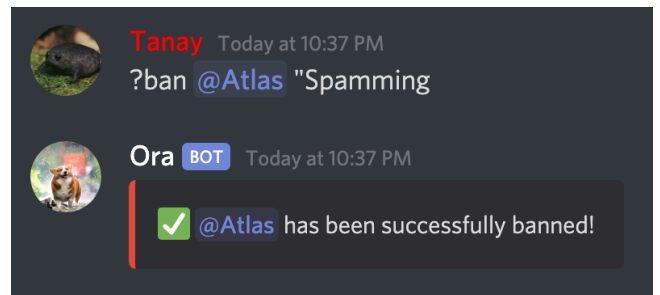

Admin Commands

There are a wide range of admin commands provided by Ora. Whether you need to ban a troll or kick a bot, we've got you covered. All of the following admin commands are restricted to administrators of the server

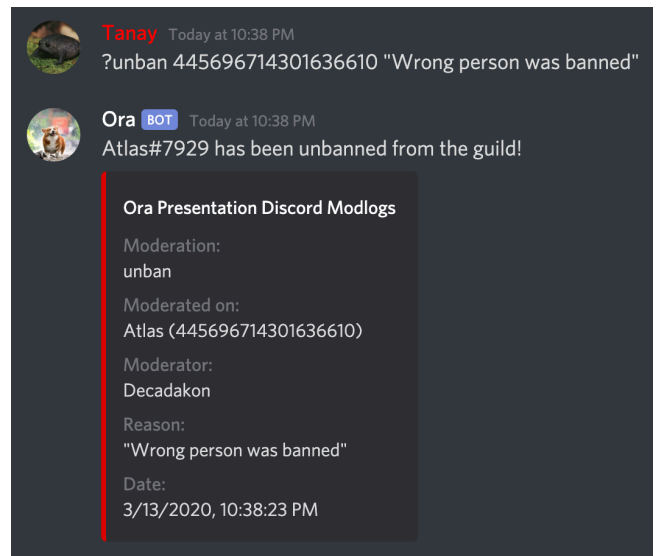

?ban [user] "reason"

Ban a user from the server. Ora will dm the user and notify them that they have been banned from the server.

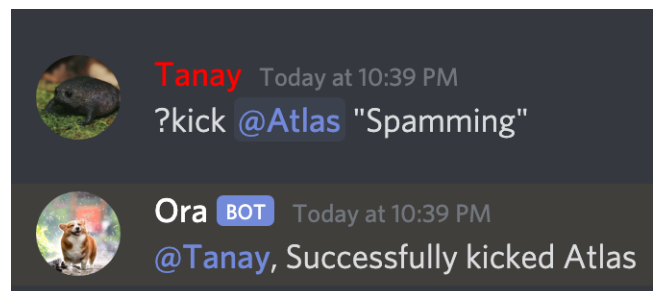

?unban [userId] "reason"

Unban a user from the server using their unique Discord user id. This id can be obtained through the use of Discord developer settings. Once developer settings are enabled, "Copy ID" is an option when right-clicking a user's name which allows you to copy the user's user id.

?kick [user] "reason"

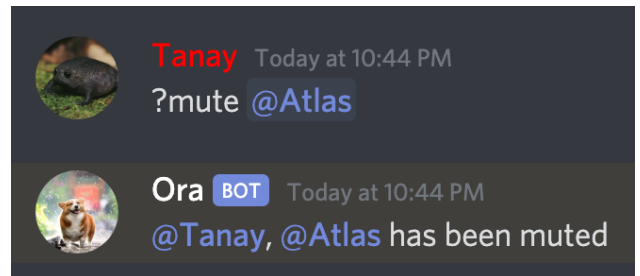

Kick a user from the server. Ora will update the audit log with the reason for the action.

Admin Commands

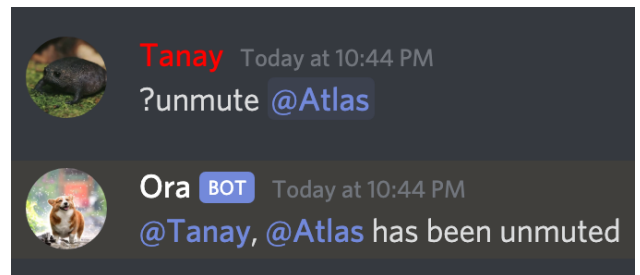

?mute [user]

Mute a user on the server. This prevents them from sending or reacting to messages on the server.

?unmute [user]

Unmute a user on the server.

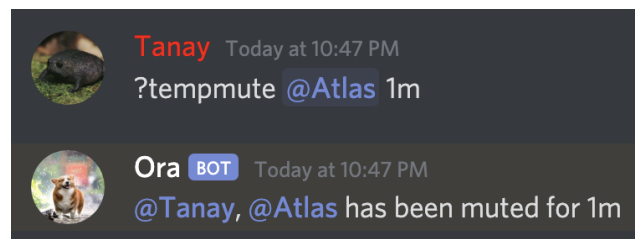

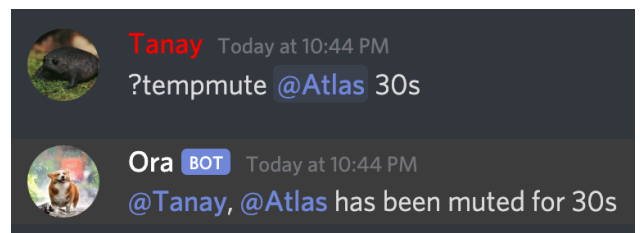

?tempmute [user] [time]

Temporarily mute a user on the server. The time must be entered with the following syntax: 1h

The following characters are valid time values:

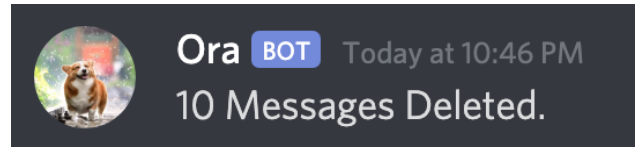

s = second
m = minute
h = hour
d = day
w = week
y = year

Admin Commands

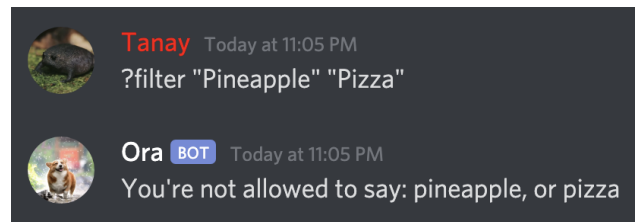

?purge [number of messages]

Delete a specified number of recent messages. This can be handy when cleaning up channels for future discussion.

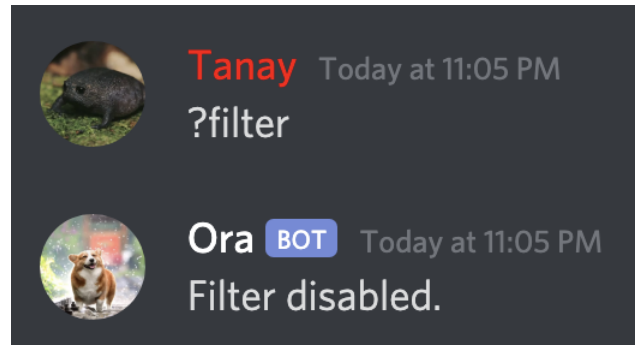

?filter "word1" "word2"

Set the list of banned words to be automatically deleted by Ora. This allows you to create a chat filter.

?filter

Disable the filter.

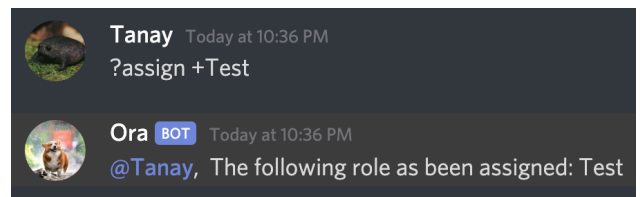

Utility Commands

Ora provides an extensive array of utility commands to keep your Discord members engaged with your server. Your members will be able to keep in touch with twitter, assign roles and even check the weather from the comfort of your Discord server

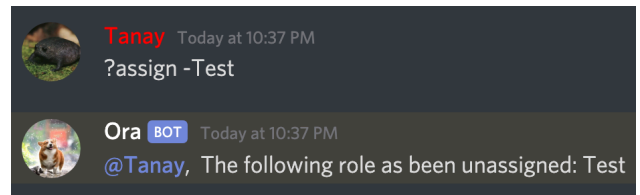

?assign +[roleName]

Add a specified role. This will allow your users to assign roles to themselves. When creating roles ensure that the roles to be assigned are below Ora's in the role hierarchy.

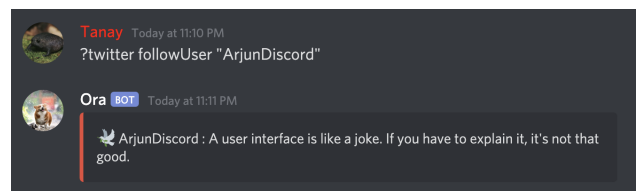

?assign -[roleName]

Remove a specified role. This will allow your users to remove roles from themselves.

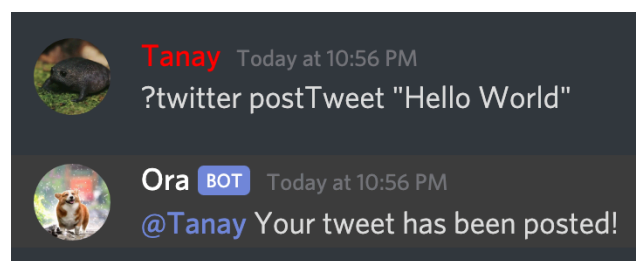

?twitter followUser "twitterHandle"

Follows the twitter user and posts future tweets to the channel.

?twitter postTweet "tweet"

Posts specified tweet to a linked twitter account.

Utility Commands

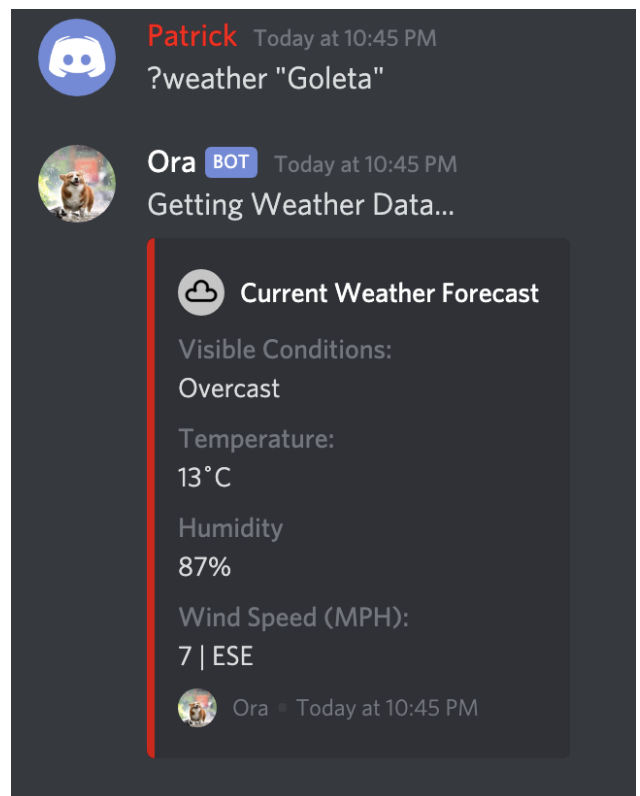

?twitter getLastTweet "twitterHandle"

Posts the last tweet by the twitter user to the Discord server

?weather "city name"

Posts current and forecast of weather at specified city

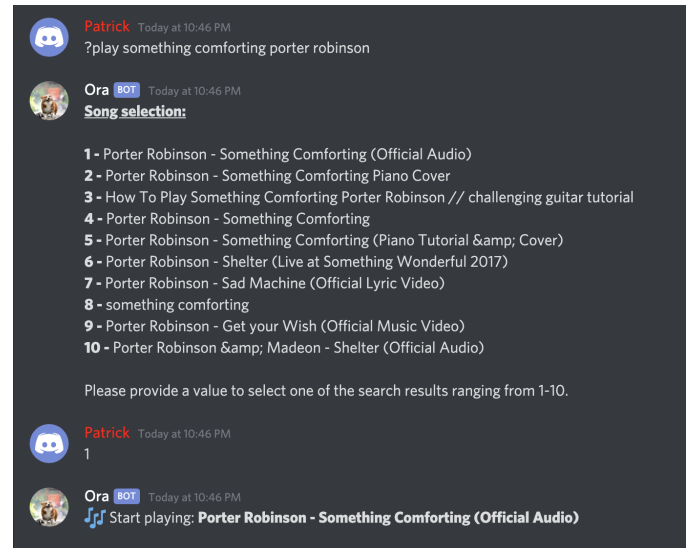

Music Commands

Ora also provides the basic capabilities of a discord music bot. Your members will be able to play their favorite songs while chatting with friends and playing games.

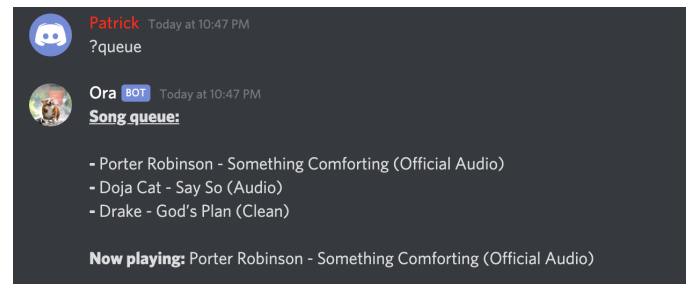

?play “song query”

Search youtube for a query and users can choose a song from the top 10 results. Ora plays this song in the user’s voice channel.

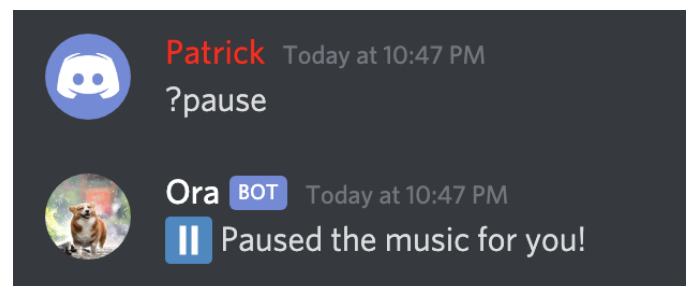

?queue

Shows the current queue of songs to be played.

?pause

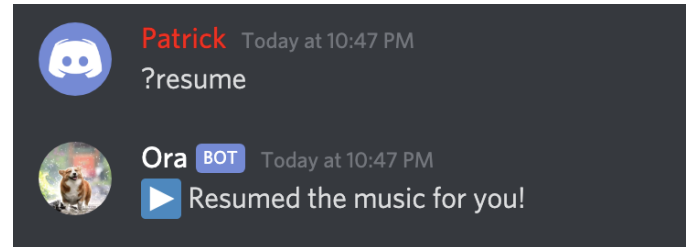

Shows the current queue of songs to be played.

Music Commands

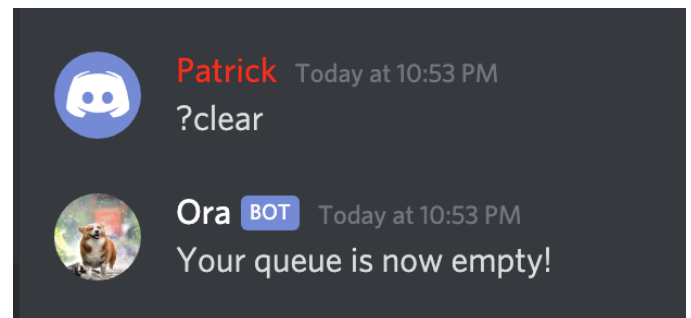

?resume

Resume the music queue if it has been currently paused.

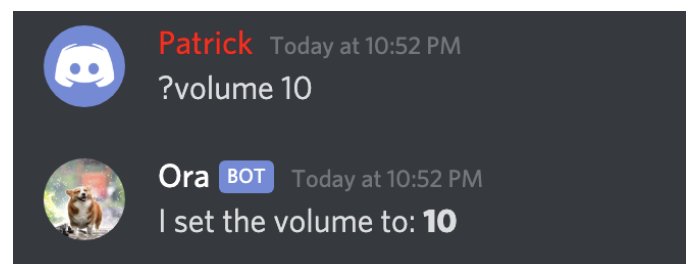

?clear

Clear the music queue. This removes all current songs from the music queue.

?volume

Set the volume of the songs (1-10)

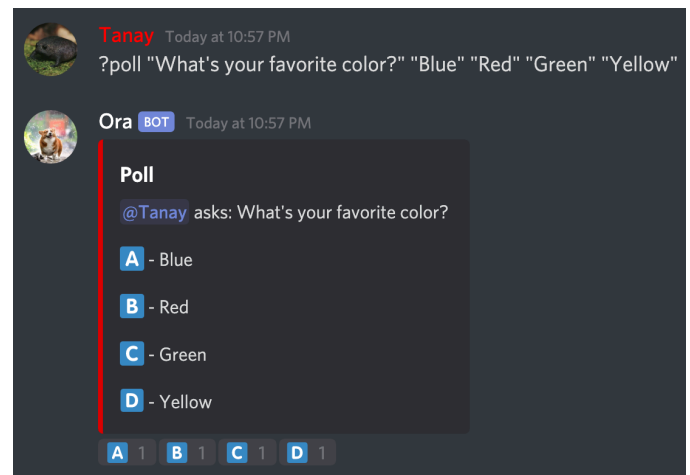

Miscellaneous Commands

Aside from the utility and music commands, Ora also provides a broad range of miscellaneous commands. Your users will be able to play games like rock, paper scissors, hangman and even Jeopardy! You will also be able to set up polls, ask jokes and more!

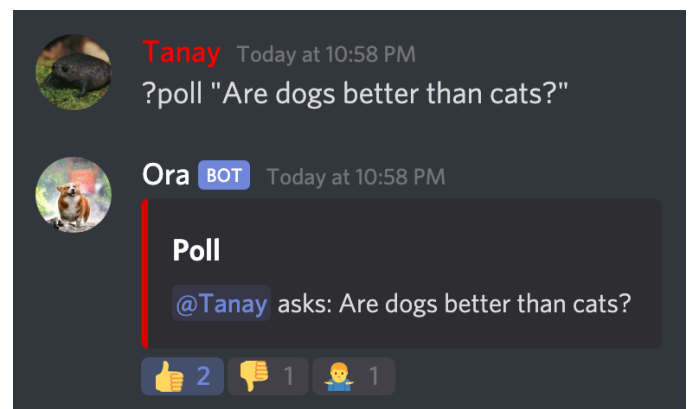

?poll [question1] [option1] [option3]

Create a multiple choice poll with the provided options (Up to 24)

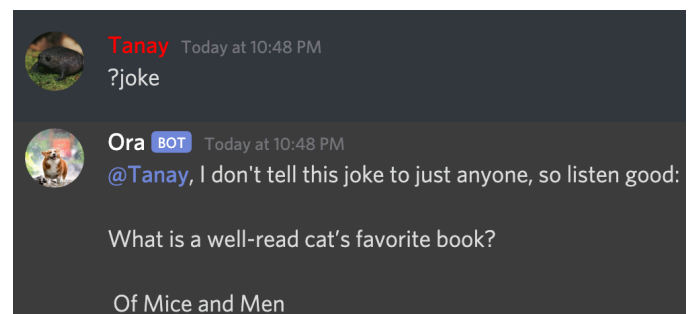

?poll [question]

Create a poll with a binary question.

?joke

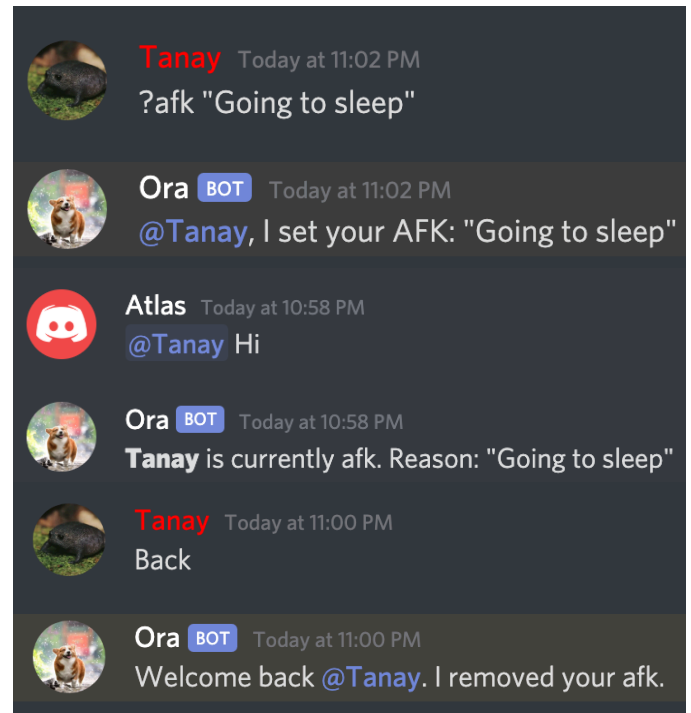

Ask Ora for a joke

Miscellaneous Commands

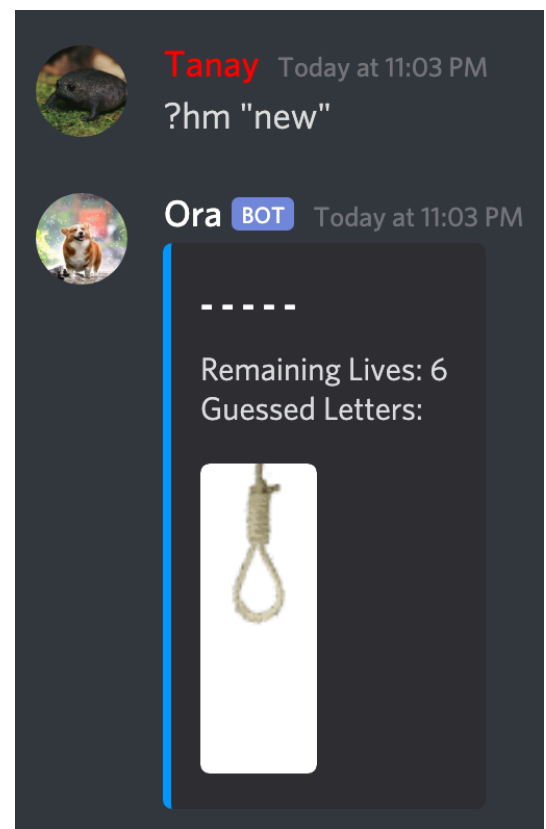

?afk [reason]

Set an afk status with a reason. When users try to notify you, Ora will let them know that you are afk. When you return, Ora will remove your afk status.

?hm "new"

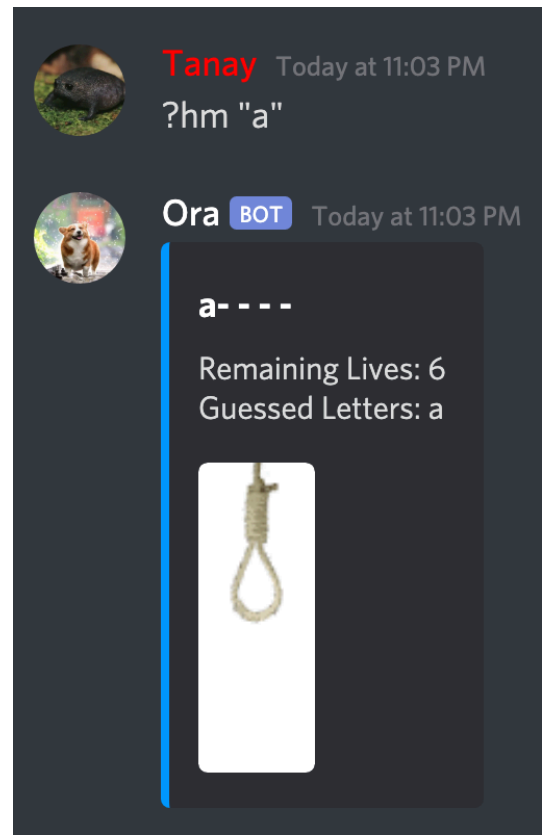

Start a new game of hangman. Any user can make guesses. But be careful, you only have 6 lives.

Miscellaneous Commands

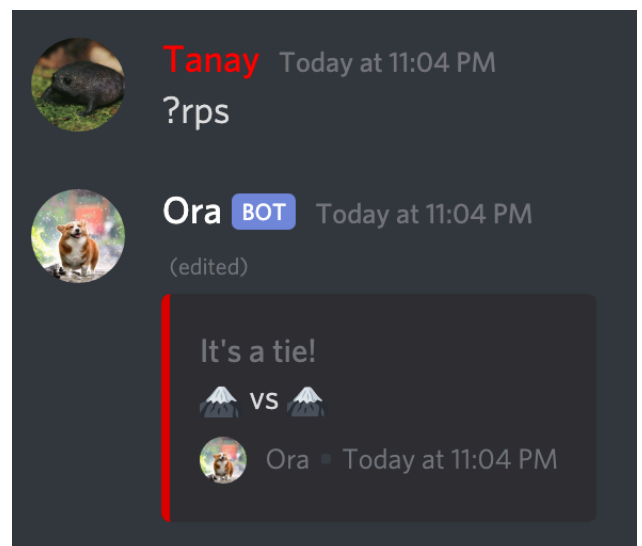

?hm "guess"

Guess a letter for the open game of hangman. Careful, you only have 6 lives!

?rps

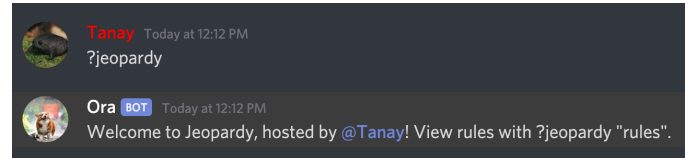

Start a rock paper scissors game. Try your luck against Ora!

Miscellaneous Commands

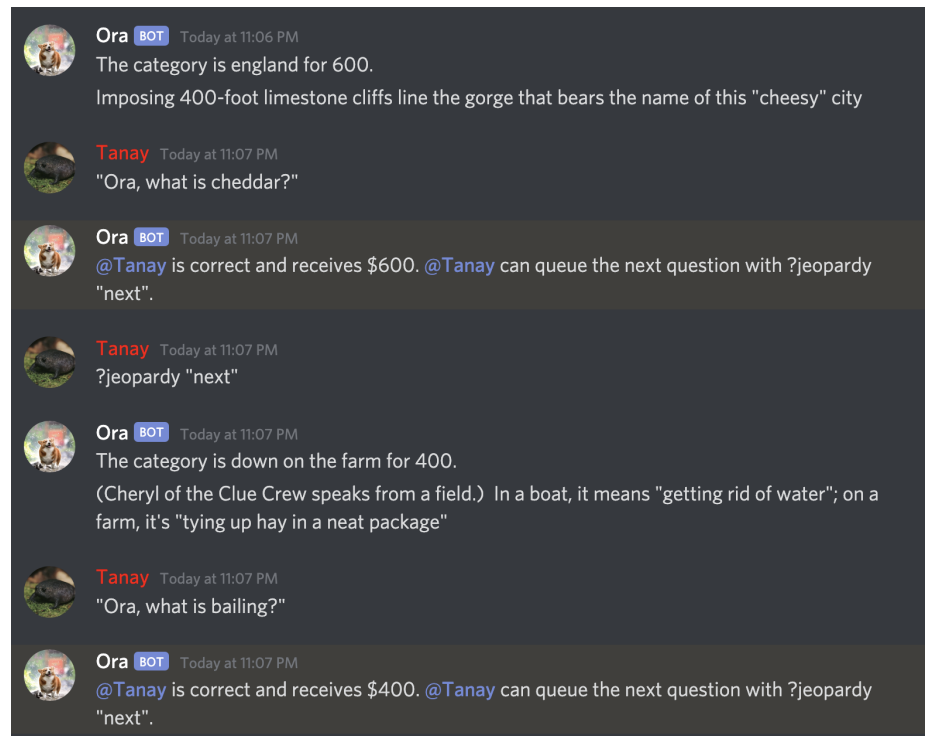

?jeopardy

Host a game of Jeopardy. Anyone on the server can participate but only the host can start rounds and end the game.

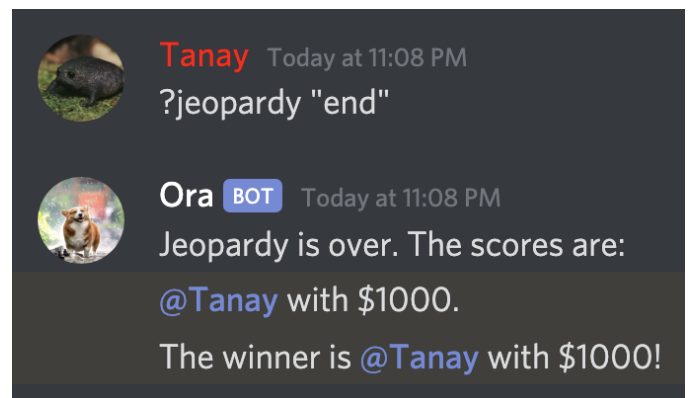

?jeopardy "next"

Start a round of Jeopardy! Only the host can call this command.

?jeopardy "end"

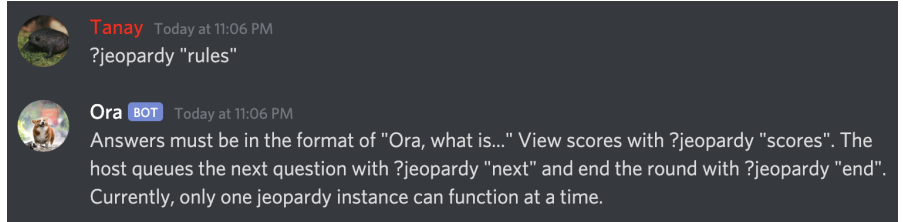

End a game of Jeopardy and display the winner! Only the host can call this command.

Miscellaneous Commands

?jeopardy “rules”

Did you forget the rules? Not to worry, we've got you covered. Ora can display Jeopardy info and all other Jeopardy-specific commands.

FAQ

I can see a blank message from Oras but other users can see it, why so?

Please make sure you enable the show website preview info from links pasted into chat. option in your account settings.

Who does Ora consider mod and admin?

Admins and Moderators are users who have the Manage server or Administrator permission.
